Table 1. Herbicide registration for peach production and other fruiti crops. Dark box is herbicides registered for that crop. Consult label for rates registered in other crops.

	Peach (product/A)	Nectarine	Plum	Orange	Blueberry	Grape
Diuron, Karmex Direx (diuron)	2 to 2.75 lb. 1.6 to 2.2 qt.					12.55 (2.71) (2.71)
Chateau (flumioxazin)	6 to 12 oz.					
Solicam (norflurazon)	1.25 to 1.5 lb.			Parada and American		
Oryzalin, Surflan (oryzalin)	2 to 6 qt.					100
Prowl H ₂ O (pendamethalin)	2 to 6.3 pt.					
Princep, Simazine 4L Princep, Simazine 90WDG7 (simazine)7	1.4 to 4 qt. 1.6 to 4.4 lb.					
Sinbar (terbacil)	0.5 to 2 lb.					
Treflan (trifluralin)	1 to 1.5 pt.					
Aim (carfentrazone)	0.5 to 2 fl. oz					
Select, Select Max (clethodim)	9 to 16 fl. oz.					
Clopyr Ag (clopyralid)	0.3 to 0.7 pt.					VI (Prince of the Control of the Con
Fusilade (fluazifop)	16 to 24 fl oz					
Roundup, others (glyphosate)	Various					
Gramoxone Firestorm (paraquat)	2.5 to 4 pt. 1.7 to 2.7 pt.					
Poast (sethoxydim)	1.5 to 2.5 pt.					

Peter Dittmar, PhD Horticultural Science 352-273-4771 office pdittmar@ufl.edu

The reverse side of this handout has herbicides registered for peach production. Listed is the amount of product/A registered for application to peach. Consult the label for quantities based on soil type and size of the weeds.

Also included are other fruit crops. A gray box means the herbicide is registered for application in that crop. Consult the label for rates in individual crops.

Additional information is available at the UF/IFAS EDIS website (edis.ifas.ufl.edu).
